

# PULSER SHIELD

Fuel theft remains a serious industry issue, particularly by manipulating dispenser pulsers. D&H United has developed an innovative solution to combat this threat: the Pulser Shield for existing Gilbarco Encore® 300, 500, & 700 standard-capacity retail dispensers.

MOST COST-EFFECTIVE  
PULSER COVER SECURITY  
SOLUTION ON THE MARKET

INSTALLATION IN AS  
LITTLE AS ONE HOUR  
PER DISPENSER

WORKS WITH EXISTING ENCORE®  
300, 500, & 700 STANDARD  
CAPACITY RETAIL DISPENSERS

WORKS ON 3+0  
AND 3+1 MODELS

SUPPORTS ALL  
PRINTER TYPES

TWO SHIELDS PER  
DISPENSER

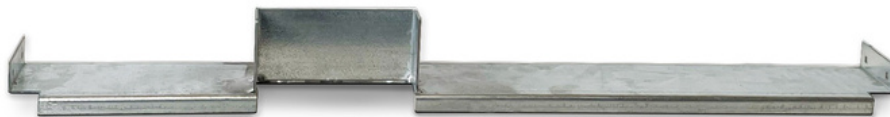

ACCESS REQUIRES  
REMOVAL OF DISPENSER  
SIDE PANELS

HEAVY 12 GAUGE STEEL  
REINFORCED ANGLED  
BEND DESIGN

CARRIAGE BOLTS  
PREVENT REMOVAL OF  
SHIELD

The Pulser Shield is designed to lock down the dispenser pulsers by integrating a protective shield into the frame of the dispenser, covering the pulsers. This makes access to the pulsers a challenging and time-consuming task, requiring the removal of both the dispenser side panels and the shield itself.
