If you are running an independent repair shop or a large automotive dealership, D&H United can assist you in selecting the appropriate automotive equipment. D&H offers a one-stop-shop solution for all your needs, including the design, installation, and servicing of lifts, fluid dispensing systems, and compressors.

Selecting the right installation partner is as crucial as choosing the appropriate equipment. D&H United provides professional installation or replacement of all the products they distribute, including some of the industry's best brands like Rotary Lifts, Graco fluid handling, Lincoln, Champion, and Saylor-Beall air compressors, whether you are constructing a new automotive facility or need to replace old equipment.

D&H United has been designing and installing vehicle lifts for auto body shops and dealerships all over the United States since 1949. While many automotive equipment companies are sales-based, D&H is proud to install and service all of the equipment we sell. In other words, if we install your equipment, we will also service and inspect it.

D&H United Fueling Solutions dispatches certified automotive technicians to inspect, maintain, and repair automotive equipment across the United States.
