D&H United Fueling Solutions offers a full line of Environmental Remediation services, for spills of any size. The D&H remediation team is staffed by proven, licensed personnel with the top of the line equipment. Our environmental team has experience working with flammable liquids, corrosives, oxidizers, toxics and poisons including liquid, gas, semi-solids and solid forms.

Our staff can assist with federal and state compliance regulations, analytical services, design and implementation of remedial systems for corrective action and preparation of permit applications. We also have the resources to respond to your emergency with PPE ranging from level D to level A. Our Emergency Response teams are fully equipped to handle any job, 24 hours a day, seven days a week.

SERVICES INCLUDE:

- Vacuum Trucks
- ER & Spills
- Hazwoper Training
- Remediation
- Tank Cleaning
- FuelPure
- Construction & Excavation Services
- Mobile High Vacuum Extraction
- Disinfecting Services

We also specialize in Mobile High Vacuum Multi-Phase Extraction events utilizing liquid ring pumps to achieve vacuums of up to 27 in Hg. We offer a variety of equipment such as thermal and catalytic oxidizers, rotary blowers and internal combustion engines.

Our technicians can support your environmental project by performing groundwater sampling, PSH gauging-bailing, monitoring well sampling, soil-waste sampling, drill-cuttings disposal and equipment repairs. We have extensive experience in wastewater and storm water, sampling and monitoring. Our staff is highly trained and provided with HAZWOPER training.
