D&H United Fueling Solutions is a leading supplier of fueling and EV charging systems installation and service in the US. Our top priority is providing excellent service to our customers. Our team of factory-trained technicians offers technical support 24/7, every day of the year, with a fleet of GPS-equipped service vehicles available for immediate dispatch.

We offer a wide range of services, including maintenance, repair, and certified calibration of fuel systems, dispensers, point of sale systems, and fuel quality services. Our team also provides mechanical, electrical, and electronic testing, as well as spill bucket and containment sump inspection, tank and line testing and compliance, site assessments, preventative maintenance programs, and project management.

We have a large fleet of late-model GPS-equipped trucks, stocked with repair parts, onboard laptops, air cards, parts scanners, and all the necessary equipment. Our team delivers over 65,000 service work orders per year, and we work with customers to develop the right service program for their specific needs.

At D&H United Fueling Solutions, we are dedicated to providing the best service in the industry.
